

# When Working Near Or With Electrical Power

## Protect Yourself With These Hurricane Clean-Up Habits

DO

DON'T

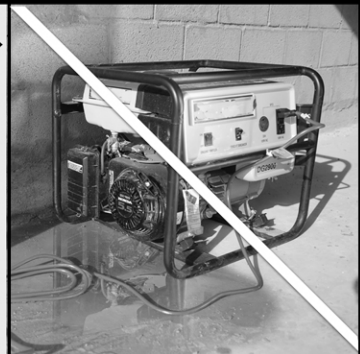

**1** Stay at least 10 feet away from power lines.

**2** Never touch or come close to a fallen power line.

**3** Do not use electrical equipment if you are standing in or near water.

**4** When working in damp locations always use a Ground Fault Circuit Interrupter (GFCI) — such as a remote pig-tail type GFCI.
